***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, there is no antecedent basis for "the known upstream volumetric flow rate" and "the known downstream volumetric flow rate".

In claim 14, "section)" is unclear, and there is no antecedent basis for "the aerosolized mass".

***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the specification does not disclose a "mixing changer" as claimed in claim 23. Clarification and correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3761

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 28 is rejected under 35 U.S.C. 102(b) as being anticipated by Pischinger, et al.-4634459.

Pischinger discloses a device having a porous media collection element 5, a delivery tube 2, and a perforated support element 18.

Claim 28 is rejected under 35 U.S.C. 102(e) as being anticipated by Liu, et al.-6221136.

Liu discloses a device having a porous element 26, an aerosol delivery tube 116 and a perforated support element 114.

Claims 30 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Wellinghoff, et al.-4801411.

Wellinghoff discloses a device having an impactor plate 86, an impactor jet 40 capable of delivering the aerosol at supersonic velocities; and an output conduit 104.

Claims 32 and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Postma, et al.-4029482.

Postma discloses a device having a mass delivery section 12, a drift tube (tube connected between 12 and 11), and the deposition section 11, 10, 13, 15, 16, 17, 20, 18 receiving the drift tube and having a gas source connected to inlet 11.

Art Unit: 3761

***Allowable Subject Matter***

Claim 29 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-14 and 23 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

***Conclusion***
